All submissions for this problem are available.

Read problems statements in [Mandarin Chinese](#), [Russian](#) and [Vietnamese](#) as well.

Limak is a little polar bear, who loves eating cookies and drinking milk. For this reason he often visits Chef's kitchen.

Limak is going to spend  $N$  minutes in the kitchen. Each minute he either eats a cookie or drinks milk. Cookies are very sweet and thus Limak's parents have instructed him, that after eating a cookie, he has to drink milk in the next minute.

You are given whether he ate a cookie or drank milk in each of the  $N$  minutes. Your task is to check if Limak followed his parents' instructions. That is, you need to verify whether after each eaten cookie he drinks milk in the next minute. Print "YES" or "NO" for each test case accordingly.

## Input

The first line of the input contains an integer  $T$  denoting the number of test cases. The description of  $T$  test cases follows.

The first line of each test case contains an integer  $N$  denoting the number of minutes.

The second line of a test case contains  $N$  space-separated strings  $S_1, S_2, \dots, S_N$ . The string  $S_i$  is either "cookie" (if Limak eats a cookie in the  $i$ -th minute) or "milk" (otherwise).

## Output

For each test case, output a single line containing the answer — "YES" if Limak followed his parents' instructions, and "NO" otherwise, both without the quotes.

## Constraints

- $1 \leq T \leq 50$
- $1 \leq N \leq 50$

## Example

### Input :

```
4
7
cookie milk milk cookie milk cookie milk
5
cookie cookie milk milk milk
4
milk milk milk milk
1
cookie
```

### Output :

```
YES
NO
YES
NO
```

---

## Explanation

**Test case 1.** Limak is in the kitchen for 7 minutes. He eats three cookies and after each of them he indeed drinks milk in the next minute. The answer is "YES".

**Test case 2.** Limak is in the kitchen for 5 minutes. In the first minute he eats a cookie and in the second minute he eats a cookie again, instead of drinking milk. The answer is "NO".

**Test case 3.** Here Limak doesn't eat any cookies. The answer is "YES" because the condition is satisfied (there is no situation when Limak eats a cookie but doesn't drink milk in the next minute).

**Test case 4.** Limak eats a cookie and doesn't drink milk in the next minute so the answer is "NO".

### **CodeChef - A Platform for Aspiring Programmers**

CodeChef was created as a platform to help programmers make it big in the world of algorithms, **computer programming** and **programming contests**. At CodeChef we work hard to revive the geek in you by hosting a **programming contest** at the start of the month and another smaller programming challenge in the middle of the month. We also aim to have training sessions and discussions related to **algorithms**, **binary search**, technicalities like **array size** and the likes. Apart from providing a platform for **programming competitions**, CodeChef also has various algorithm tutorials and forum discussions to help those who are new to the world of **computer programming**.

### **Practice Section - A Place to hone your 'Computer Programming Skills'**

Try your hand at one of our many practice problems and submit your solution in a language of your choice. Our **programming contest** judge accepts solutions in over 35+ programming languages. Preparing for coding contests were never this much fun! Receive points, and move up through the CodeChef ranks. Use our practice section to better prepare yourself for the multiple **programming challenges** that take place through-out the month on CodeChef.

### **Compete - Monthly Programming Contests and Cook-offs**

Here is where you can show off your **computer programming skills**. Take part in our 10 day long monthly coding contest and the shorter format Cook-off **coding contest**. Put yourself up for recognition and win great prizes. Our **programming contests** have prizes worth up to INR 20,000 (for Indian Community), \$700 (for Global Community) and lots more CodeChef goodies up for grabs.
